Education

ENSISA | Mulhouse

*Computer Science & Networks
Engineering Degree*

September 2025 – July 2028

IUT de Colmar | Colmar

*Bachelor's Degree in Networks &
Telecommunications*

September 2023 – July 2026

Lycée Gustave Eiffel | Dijon

*High School Diploma – Technology
& Sustainable Development*

September 2020 – July 2023

Certifications

- Stormshield
- TOEIC
- SIP Certification

Languages

- Italian (C2)
- French (C2)
- Arabic (C2)
- English (B2)
- Spanish (B1)

Interests

- Volleyball
- Football
- Cooking

About Me

Computer Science & Networks Engineering student at ENSISA, seeking a 9-week international internship in networking, systems administration or cybersecurity.

Skills

Network Infrastructure (Networking)

Experience in the administration and management of corporate network infrastructures: equipment configuration, monitoring and troubleshooting.

Systems Administration (Systems)

Administration of Windows Server environments with Active Directory, backups using Veeam, and identity management with Azure AD and ABM.

Scripts & Personal Projects (Development)

Development of Python scripts using Scapy for host discovery and MITM attack simulation, as well as the creation of my personal website.

Security Audit & Pentest (Cybersecurity)

Conducted a full penetration test including scanning, exploitation and vulnerability analysis using Nmap, Metasploit, Responder and CrackMapExec.

Work Experience

*August 2026 – Present | STIHLE – Apprenticeship
Apprentice Systems & Network Administrator*

- Implementation of 802.1X / RADIUS authentication to secure workstations, IP phones, access points and printers.
- Deployment of AppLocker policies and management of authorized applications.
- Automation of NAV processes using Power Automate Desktop.
- Automation of Kiamo workflows and integration of AI/Copilot features into GLPI.

*August 2025 – July 2026 | Trench Group – Apprenticeship
Apprentice Systems & Network Administrator*

- Administration of Windows Server environments, internal network infrastructure and Fortinet equipment.
- Monitoring, N2/N3 troubleshooting and maintenance of information system security.
- Conducted an internal/external security audit and penetration test.

*February – April 2025 | ADISTA – Internship
Networks & Telecommunications Technician*

- Deployment of routers and management of FTTH/fiber infrastructures.
- Configuration of BGP, HSRP, RADIUS, TACACS and Fortinet firewalls.
- On-site installation, maintenance and troubleshooting of network equipment.
